DETAILED ACTION

Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 and 13-15, drawn to a method for treating an inflammatory or autoimmune condition comprising administering a compound having the structure set forth in claims 1 and 13;
- II. Claims 1, 4, 5, 17 and 18, drawn to a method for treating a cardiovascular, metabolic or ischemic condition comprising administering a compound having the structure set forth in claims 1 and 17;
- III. Claims 1, 6-8 and 19-21, drawn to a method for treating a infectious disease comprising administering a compound having the structure set forth in claims 1 and 19;
- IV. Claims 1, 9, 12 and 22-25, drawn to a method for treating a cancer comprising administering a compound having the structure set forth in claims 1 and 22;
- V. Claims 1, 11 and 26, drawn to a method for treating stroke, epilepsy, and Alzheimer's disease comprising administering a compound having the structure set forth in claims 1 and 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated as they have acquired a separate status in the pharmaceutical art and restriction for examination purposes as indicated is proper. The medical disorders to be treated are independent and distinct since they have known different etiology and the compounds have different effects i.e. fungicides.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
